## About

Autodesk makes software for people who make things. If you've ever driven a high-performance car, admired a towering skyscraper, used a smartphone, or watched a great film, chances are you've experienced what millions of Autodesk customers are designing and making with our software.

## **Jim Lynch** **Vice President, Construction Products Group**

Jim's organization is responsible for establishing product vision and strategy, and for designing and developing the family of products and services that address the needs of the worldwide Architecture, Engineering, and Construction (AEC) industry.

## Fast Facts

Employs approximately 250 people in Massachusetts and hosts an additional 300+ architects, engineers and construction professionals in their BUILD Space, where they conduct research and development of next generation prefabrication techniques for building construction.

Occupies 70,000 square feet in South Boston's Innovation and Design Building (and expanding), including the 34,000 square foot Building, Innovation, Learning and Design Space (BUILD Space).

Over 200+ million customers—including design professionals, engineers and architects, digital artists, students, and hobbyists—use Autodesk software to design and make the world around us.

Provides all software for free to students at every level of education, everywhere.
