

Autodesk makes software for people who make things. If you've ever driven a high-performance car, admired a towering skyscraper, used a smartphone, or watched a great film, chances are you've experienced what millions of Autodesk customers are designing and making with our software.

- Employs approximately 250 people in Massachusetts and hosts an additional 300+ architects, engineers and construction professionals in their BUILD Space, where they conduct research and development of next generation prefabrication techniques for building construction.
- Occupies 70,000 square feet in South Boston's Innovation and Design Building (and expanding), including the 34,000 square foot Building, Innovation, Learning and Design Space (BUILD Space).

Jim Lynch, Vice President
Construction Products Group

HEADQUARTERS

Boston, Massachusetts

STATS

- Over 200+ million customers—including design professionals, engineers and architects, digital artists, students, and hobbyists—use Autodesk software to design and make the world around us.
- Provides all software for free to students at every-level of education, everywhere.
